

How to apply on the hand

For this application, you will need one Mepilex® Ag 10x20cm dressing, one Mepilex® Ag 15x15cm dressing, and one Mepilex® Ag 10x10cm dressing.

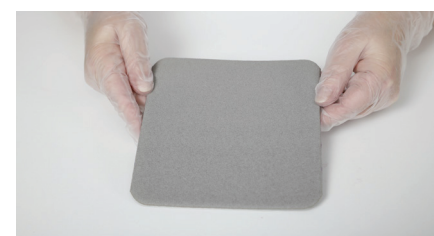

1. Use Mepilex Ag 10x20cm to cover the hand.

2. Fold the dressing and make four small, equidistant cuts (about 1.5cm long).

3. Apply the dressing by making each finger slide into the newly created holes.

4. Use Mepilex Ag 15x15cm to cover the fingers.

5. Cut the dressing in four slats of the same width.

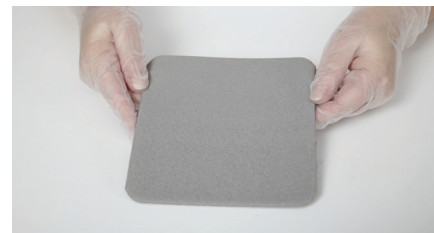

6. Cut the corners of each slat at an angle and cut out two small, aligned triangles (about 0.5cm deep) on each side of the dressing.

7. Apply one part of the dressing to the finger and fold it back using the newly created small triangles.

Tip: You can cut some slats shorter for shorter fingers.

8. Use Mepilex Ag 10x10cm to cover the thumb.

9. Cut the dressing on both sides.

10. Cut another of the remaining round corners to have three straight sides.

11. Roll the dressing around the thumb to cover it.

Assortment overview

Mepilex® Ag

An antimicrobial foam dressing for low-to-medium exuding burns. It absorbs exudate and maintains a moist wound environment. It provides fast (from 30 minutes), sustained and broad-range antimicrobial action for up to 7 days, as shown in vitro.

The Power of Gentle

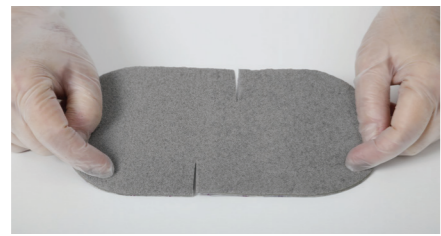

How to apply on the shoulder

For this application, you will need one Mepilex® Ag 10x20cm dressing.

1. Use Mepilex Ag 10x20cm.

2. Make two small, slightly misaligned cuts (about 1cm long) on each side of the dressing (see image).

3. When applying the dressing, create an overlap using the small cuts. This will enable greater freedom of movement for mobile body parts.

How to apply on the elbow and knee

For this application, you will need one Mepilex® Ag 10x20cm dressing.

1. Use Mepilex Ag 10x20cm.

2. Cut out two small triangles (about 1cm deep) on each side of the dressing. These cuts should be aligned.

3. When applying the dressing, make sure the edges of the cuts are aligned to avoid leakage.

Tip:
All application techniques shown in this document are also applicable with **Mepilex® Transfer Ag**.

How to apply on the neck and chest

For this application, you will need three dressings in total: two Mepilex® Ag 10x20cm and one Mefix® 5cm width.

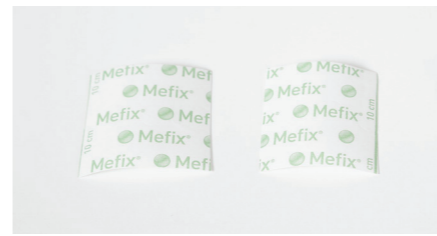

Step 1: Application on the neck

1. Use Mepilex Ag 10x20cm.

2. Cut the dressing lengthwise from end to end.

3. Cut two pieces of Mefix (about 5cm long).

4. Start by applying the first part closer to the face and then apply the second part aligned edge to edge with the first.

5. Secure the two dressing parts with one piece of Mefix (about 5cm long).

Step 2: Application on the chest

1. Use Mepilex Ag 10x20cm.

2. Cut the rounded end from the dressing to create a straight edge.

4. Secure the dressing parts with one piece of Mefix (about 5cm long).

How to apply on the face

For this application, you will need two Mepilex® Ag 10x20cm dressings.

1. Use 2 Mepilex Ag 10x20cm dressings.

2. Each dressing will cover one part of the face.

3. Identify where the eyebrow and the lower part of the eye are located.

4. Remove a part of the dressing to create space for the eye (about the length of index finger).

5. Identify where the mouth is located.

6. Cut out one small triangle (about 1cm long) to create space for the mouth.

7. Identify where the wing of the nose is located.

8. Cut out enough space in the dressing to accommodate the nose, where you identified the location of the wing of the nose in the previous step.

9. Now the dressing is cut to cover one side of the face; use this pattern to cut another dressing.

10. Use the part of the dressing you removed to cover the nose.
